SUBJECT INDEX

Adsorbed molecules
Diffuse reflectance laser flash photolysis of adsorbed molecules 305

Adsorption
Adsorption processes on semiconductor colloids studied by pulsed-laser-induced electron-transfer reactions 513

Adsorption isotherm
Inhibitory effect of 2-mercapto pyrimidine on corrosion of copper single crystal planes in 0.1 M H_2SO_4 763

Aerosol-OT(AOT) reverse micelles
Biomimetic oxidation of N-nitrosodibenzylamine with molecular oxygen catalysed by chemical cytochrome P-450 in AOT reverse micelles 645

Agricultural fungicides
The synthesis and evaluation of 2-imino-3-(4-arylthiazol-2-yl)-4-thiazolidinones and their 5-arylidene derivatives as potential agricultural fungicides 33

Alclofenac
Heterotropic binding of alclofenac and dansylsarcosine to bovine serum albumin 173

Alcohol acetonitrile complexes
Enthalpies of mixing of acetonitrile with isomeric butanols: Enthalpies of hydrogen-bonded complexes 189

Aldolase
Flexibility of the aldolase molecule measured using quenching induced variations of the Forster distance for fluorescence energy transfer 435

Alkylbenzene sulphonate
Oxidation of dyes by manganese tetraphenyl porphyrin activated peroxy bleach 83

Aminopolycarboxylate
Complexing tendencies of UO_2^{2+} and Th^{4+} in their mixed ligand complexes with aminopolycarboxylates and resorcinol or its derivatives 119

Anion disproportionation
Formation of lead pyrophosphate glass and the role of anion disproportionation 655

Anion effects
Underpotential deposition of copper on electrochemically treated polycrystalline Au surfaces 677

Anisotropy
Anisotropy studies of ultrafast dipole reorientations 351

Annealing
EPR of vanadyl ion in a natural mineral, apophyllite 613

Anthracene
Charge transfer and van der Waals states of jet-cooled dialkylaniline complexes with anthracene 477

Apophyllite
EPR of vanadyl ion in a natural mineral, apophyllite 613

Aporoximate energy level diagram
Buckminsterfullerene, C_{60}: Improved synthesis, electron microscopy, electron states, anions and related aspects 685

Aryl *cis*- and *trans*-styryl sulphides and sulphones
Dipole moments of aryl *cis*- and *trans*-styryl sulphides and sulphones 631

Au electrodes
Underpotential deposition of copper on electrochemically treated polycrystalline Au surfaces 677

Bacterium chlorophyll
Energy transfer kinetics in the green bacterium *Chloroflexus aurantiacus* 413

Barrierless reactions
Photochemical isomerization in the absence of a potential barrier 441

Batch equilibration
2-hydroxy, 4-methoxy-propiophenone–urea–formaldehyde copolymers and their application as ion-exchangers 539

Benzene derivatives
Multiphoton dissociation of some aromatic molecules. Formation of atomic carbon in the $2p^2\,{}^1S_0$ excited state 459

Benzyl halide
Are all charge-repulsed carbocations really unstable? Dramatic difference in reactivities of benzyl- and *p*-methoxybenzyl halides in benzene 195

5-Benzylidine-2-imino-3-(4-*p*-tolylthiazol-2-yl)-4-thiazolidinone
The synthesis and evaluation of 2-imino-3-(4-arylthiazol-2-yl)-4-thiazolidinones and their 5-arylidene derivatives as potential agricultural fungicides 33

Bidentate ligand
Polystyrene anchored rhodium(I) bidentate ligand complexes as catalysts for hydrogenation 99

Biomimetic oxidation
Biomimetic oxidation of N-nitrosodibenzylamine with molecular oxygen catalysed by chemical cytochrome P-450 in AOP reverse micelles 645
3-*Bis*-hydroxymethyl chromanones
A study of ethoxymethylation in the 3-position of chroman-4-ones 25
Bis(2,2′-bipyridyl) copper(II) permangante
Kinetic study of oxidation of some thioacids by *bis*(2,2′-bipyridyl copper(II) permanganate 741
Bis(cyclopentadienyl) titanium(IV)
Studies on *bis*(cyclopentadienyl) titanium (IV) chelates of biologically active O-hydroxynaphthoquinone and its derivatives 607
Bivalent ions
Potentiometric studies on the complexation equilibria involving diacetylmono(lepidyl) hydrazone and bivalent metal ions in aqueous ethanolic medium 17
Bivalent metal complexes
Synthesis and spectral studies on Co(II) and Ni(II) complexes with polyfunctional quinzolin-(3H)-4-ones 599
Bleaching
Oxidation of dyes by manganese tetraphenyl porphyrin activated peroxy bleach 83
Bolometic thermal detection
Thermal detection laser spectroscopy of molecular beams 203
Bonding parameters
EPR of vanadyl ion in a natural mineral, apophyllite 613
Bovine serum albumin
Heterotropic binding of alclofenac and dansylsarcosine to bovine serum albumin 173
Buckminsterfullerene
Buckminsterfullerene, C_{60}: Improved synthesis, electron microscopy, electron state, anions and related aspects 685
Burkeite
Recovery of sodium chloride, sodium sulphate and sodium carbonate from Sambhar Lake brine-A theoretical study 9

C_{60}
Buckminsterfullerene, C_{60}: Improved synthesis, electron microscopy, electron states, anions and related aspects 685
CIFC=CFCI
Multiphoton geometrical isomerization of CIFC=CFCI. Selective purification of the *trans* isomer 455
CO_2-laser
CH_3F absorption of the CO_2-laser emission measured by the photoacoustic technique 405
Buffer gas effect on laser photoacoustic spectra of methyl chloride 409
SO_2 absorption of the CO_2-laser emission measured by the photoacoustic technique 401
Calorimetry
Enthalpies of mixing of acetonitrile with isomeric butanols: Enthalpies of hydrogen-bonded complexes 189
Carbohydrazide
Kinetics and mechanism of oxidation of carbohydrazide and thiocarbohydrazide by N-bromoacetamide 55
β-Carbon and nitrogen atoms
Conformational analysis of cinnamanilides 155
Carbon two-photon transitions
Multiphoton dissociation of some aromatic molecules. Formation of atomic carbon in the $2p^2\,{}^1S_0$ excited state 459
Carboxylatopentaamminecobalt(III) complex
Photoinduced inter- and intramolecular electron transfer reactions of carboxylatopentaamminecobalt(III) and excited state *tris*(2,2′-bipyridine) ruthenium (II) complexes 735
Catalyst
Kinetics of formation of 1,1′-*bis*(3-methyl-4-hydroxyphenyl) cyclohexane 149
Catalytic hydrogen currents
Catalytic hydrogen currents at DME in the presence of thio compounds 185
Ceramic materials
Laser production of clusters as precursors of ceramic materials, semi- and superconductors 325
Charge transfer state
Charge transfer and van der Waals states of jet-cooled dialkylaniline complexes with anthracene 477
Charge-repulsed carbocations
Are all charge-repulsed carbocations really unstable? Dramatic difference in reactivities of benzyl- and *p*-methoxybenyl halides in benzene 195
Charge-transfer complexes
Conductometric study of charge transfer complexes 69
Chelates
Studies on *bis*(cyclopentadienyl) titanium (IV) chelates of biologically active O-hydroxynaphthoquinone and its derivatives 607
Chelation ion-exchange
2-hydroxy, 4-methoxy-propiophenone–urea–formaldehyde copolymers and their application as ion-exchangers 539
Chemical cytochrome P-450
Biomimetic oxidation of N-nitrosodibenzylamine with molecular oxygen catalysed by chemical cytochrome P-450 in AOT reverse micelles 645

Chloromethane
Buffer gas effect on laser photoacoustic spectra of methyl chloride 409
Chlorosomes
Energy transfer kinetics in the green bacterium *Chloroflexus aurantiacus* 413
Chromium (VI)
Catalytic hydrogen currents at DME in the presence of thio compounds 185
Chromium(III)–polypyridyl complexes
Thermal and photoreactivities of oxalato*bis*(polypyridyl)chromium(III)complexes in aqueous medium 715
Chromyl chloride
Theoretical investigation of internal conversion in chromyl chloride 369
Cinnamanilides
Conformational analysis of cinnamanilides 155
Closed-cage molecules
Buckminsterfullerene, C_{60}: Improved synthesis, electron microscopy, electron states, anions and related aspects 685
Clustering behaviour
Effect of trace elements on carbon micro particle formation 517
Clusters
Laser production of clusters as precursors of ceramic materials, semi- and superconductors 325
Cobalt(II)-*bis*[3-(salicylideneamino)propyl]methylamine
Oxidation of primary amines with dioxygen catalysed by an oxygen carrier cobalt(II)-Schiff base chelate, CoSMDPT 741
Complexes
Charge transfer and van der Waals states of jet-cooled dialkylaniline complexes with anthracene 477
Conductometry
Conductometry study of charge transfer complexes 69
Copolymers
2-hydroxy, 4-methoxy-propiophenone–urea–formaldehyde copolymers and their application as ion-exchangers 539
Copper(II)
Liquid–liquid extraction of copper(II) with dialkyl sulphoxides 95
Copper complexes
Electrochemical behaviour of Cu-NTA complexes 107
Core size effects
Vibrational studies of nickel porphins and octaethyl porphyrins 571
Correlation analysis
Kinetics and mechanism of the oxidation of some hydroxyacids by pyridinium fluorochromate 563
Corrosion
An insight into the self-discharge of Fe_3O_4 electrodes in alkali solutions 161
Corrosion inhibition by 2-mercapto pyrimidine
Inhibitory effect of 2-mercapto pyrimidine on corrosion of copper single crystal planes in 0·1 M H_2SO_4 763
Corrosion of copper
Inhibitory effect of 2-mercapto pyrimidine on corrosion of copper single crystal planes in 0·1 M H_2SO_4 763
Critical exponents
Laser Raman spectroscopy and its applications – especially in structural phase transitions 295
Curvularia lunata
The synthesis and evalutation of 2-imino-3-(4-arylthiazol-2-yl)-4-thiazolidinones and their 5-arylidene derivatives as potential agricultural fungicides 33
2Cu-UPD
Underpotential deposition of copper on electrochemically treated polycrystalline Au surfaces 677
Cyclic voltammetry
Electrochemical behaviour of Cu-NTA complexes 107
An insight into the self-discharge of Fe_3O_4 electrodes in alkali solutions 161
Cycloalkanes
The kinetics of hydroxyl radical reactions with cyclopropane and cyclobutane 499
Cyclohexanone
Kinetics of formation of 1,1′-*bis* (3-methyl-4-hydroxyphenyl)cyclohexane 149

Dansylsarcosine
Heterotropic binding of alclofenac and dansylsarcosine to bovine serum albumin 173
Diacetylmono(lepidyl) hydrozone
Potentiometric studies on the complexation equilibria involving diacetylmono (lepidyl) hydrazone and bivalent metal ions in aqueous ethanolic medium 17
Dialkyl sulphoxides
Liquid–liquid extraction of copper(II) with dialkyl sulphoxides 95
Dialkylaniline
Charge transfer and van der Waals states of jet-cooled dialkylaniline complexes with anthracene 477
Diaryl sulphoxides
Mechanism of permanganate ion oxidation of diaryl sulphoxides – A kinetic study 637
Diazonium salts
Simultaneous photolysis of directly linked porphyrin–diazonium salt molecule 487
Dichlorocarbene addition
Phase transfer catalysis: Kinetics and mechanism

of hydroxide ion initiated dichlorocarbene addition to styrene catalysed by triethylbenzylammonium chloride 785
1,1′-diethyl-4,4′-cyanine
Photochemical isomerization in the absence of a potential barrier 441
Dioxygen
Oxidation of primary amines with dioxygen catalysed by an oxygen carrier cobalt(II)-Schiff base chelate, CoSMDPT 741
Dipolar solvent
Relaxation dominated by inertia: Solvation dynamics of a small ion in a dipolar solvent 77
Dipole moments
Dipole moments of aryl *cis*- and *trans* styryl sulphides and sulphones 631
Distribution ratio
2-hydroxy,4-methoxy-propiophenone–urea–formaldehyde copolymers and their application as ion-exchangers 539
Dithiocarbamates
Catalytic hydrogen currents at DME in the presence of thio compounds 185
Dyes
Oxidation of dyes by manganese tetraphenyl porphyrin activated peroxy bleach 83

EPR
EPR of vanadyl ion in a natural mineral, apophyllite 613
Electrochemical characterisation
Electrochemical characterisation of porous iron electrodes 753
Electrochemistry of thio- and oxothiometalate complexes
Closed shell–closed shell S,S-bridged heteropolymetallic aggregates: Synthesis and characterisation 525
Electron transfer
Adsorption rocesses on semiconductor colloids studied by pulsed-laser-induced electron-transfer reactions 513
Electron transfer reaction
Photoinduced inter- and intramolecular electron transfer reactions of carboxylatopentaamminecobalt(III) and excited state *tris*(2,2′-bipyridine) ruthenium(II) complexes 735
Electronic spectra
Synthesis and spectral studies on Co(II) and Ni(II) complexes with polyfunctional quinazolin-(3H)-4-ones 599
Electrostatic repulsions
Conformational analysis of cinnamanilides 155
Energy transfer
Theoretical aspects of IR-laser induced dissociation and desorption processes 363
IR multiphoton dissociation of CF_3I. Pressure effect with inert and reactive gases 465
Energy transfer kinetics
Energy transfer kinetics in the green bacterium *Chloroflexus aurantiacus* 413
Enthalpy of complex
Enthalpies of mixing of acetonitrile with isomeric butanols: Enthalpies of hydrogen-bonded complexes 189
Enthalpy of mixing
Enthalpies of mixing of acetonitrile with isomeric butanols: Enthalpies of hydrogen-bonded complexes 189
Entropy factor
Synthesis of characterisation of 1-methacroyl-3-salicyloyl-2-hydroxy propane and its derivatives – A structure-reactivity kinetic study 549
Enzymatic peptide synthesis
Peptide synthesis catalysed by papain immobilised on polymer supports: Effect of the macromolecular structure and reaction conditions on synthesis 133
Estimation of hyperfine interaction
Magnetic field effect on the exciplex luminescence as a probe for estimating the hyperfine interaction in a radical ion pair system 557
Ethoxymethylation
A study of ethoxymethylation in the 3-position of chroman-4-ones 25
Exciplex
Isomerism in jet-cooled 1-cyanonapthalene complexes 447
Exciplex luminescence
Magnetic field effect on the exciplex luminescence as a probe for estimating the hyperfine interaction in a radical ion pair system 557
Excited ion-pair
Mechanism of vibrational relaxation and intersystem crossing within excited ion-pair states of I_2 417
Extraction
Liquid–liquid extraction of copper(II) with dialkyl sulphoxides 95

Faceting
Underpotential deposition of copper on electrochemically treated polycrystalline Au surfaces 677
Faradic impedance
Electrochemical characterisation of porous iron electrodes 753
Femtosecond lasers
Anisotropy studies of ultrafast dipole reorientations 351
Femtosecond spectroscopy
From femtoseconds to biology: Mechanism of bacteriorhodopsin's light-driven proton pump 283
Five-point finite difference formula
Improved hardness parameters for molecules 583

Fluorescence decay
Time resolved fluorescence spectroscopy 395
Fluorescence quenching
Flexibility of the aldolase molecule measured using quenching-induced variations of the Forster distance for fluorescence energy transfer 435
Fluorescence spectroscopy
Time resolved fluorescence spectroscopy 395
Fluoromethane
CH_3F absorption of the CO_2-laser emission measured by the photoacoustic technique 405
Force field
Vibrational studies of nickel porphins and octaethyl porphyrins 571
Formation constants
Complexing tendencies of UO_2^{2+} and Th^{4+} in their mixed ligand complexes with aminopolycarboxylates and resorcinol or its derivatives 119
Forster distance
Flexibility of the aldolase molecule measured using quenching induced variations of the Forster distance for fluoresence energy transfer 435
Four-wave-mixing spectroscopy
Multiresonance CARS spectra of quinizarin in chloroform solution 383
Free electron laser
Laser and synchtron-based sources for excited state intramolecular dynamics studies 225
Fumaranilic acids
Reactions of cyclic anhydrides. Part XXII. Direct synthesis of N-aryl α-(2,3,4,5-tetrahydro-2-imino-4-oxo-1,3-thiazole-5-yl) acetamides 621
Functionalised polymeric supports
Peptide synthesis catalysed by papain immobilised on polymer supports: Effect of the macromolecular structure and reaction conditions on synthesis 133

Gaseous cluster reactivity
Size dependence of gaseous cluster reactivity as a mechanistic probe 277
Geometric mean principle
Improved hardness parameters for molecules 583
Geometrical isomerization
Multiphoton geometrical isomerization of CIFC=CFCI. Selective purification of the *trans* isomer 455
Glauber's salt
Recovery of sodium chloride, sodium sulphate and sodium carbonate from Sambhar Lake brine – A theoretical study 9
Group charge
Electronegativity of the ionic groups. Evaluation from MNDO calculations 777
Group electronegativity
Electronegativity of the ionic groups. Evaluation from MNDO calculations 777

Hepta-coordinated Ln complexes
Complexes of some lanthanides with acetoneisonicotinoyl hydrazone: A synthetic and spectral study 725
Heterobimetallic complexes
Closed shell–closed shell S,S-bridged heteropolymetallic aggregates: Synthesis and characterisation 525
Heteropolymetalic complexes
Closed shell–closed shell S,S-bridged heteropolymetallic aggregates: Synthesis and characterisation 525
Heterotropic interaction
Heterotropic binding of alclofenac and dansylsarconsine to bovine serum albumin 173
Hexa-coordinated lanthanide complexes
Studies on 4*f*-metal(III) complexes of N-thiophene-2-carboxamidosalicylaldimine 701
High resolution IR spectroscopy
Thermal detection laser spectroscopy of molecular beams 203
Holography
Spectral hole-burning and holography 375
Homogeneous hydrogenation
Hydrogenation of olefinic substrates in aqueous and aqueous-organic biphase systems using rhodium complex of sulphonated triphenyl phosphine 1
Hydroxy acid
Kinetics and mechanism of the oxidation of some hydroxyacids by pyridinium fluorochromate 563
2-Hydroxy pyridine
Redox reactions of 2-hydroxy pyridine: A pulse radiolysis study 667
Hydroxy- and methoxy-chromanones
A study of ethoxymethylation in the 3-position of chroman-4-ones 25

IR spectroscopy
SO_2 absorption of the CO_2-laser emission measured by the photoacoustic technique 401
IR-laser induced desorption
Theoretical aspects of IR-laser induced dissociation and desorption processes 363
IR-laser induced dissociation
Theoretical aspects of IR-laser induced dissociation and desorption processes 363
IRMPD-CF_3I
IR multiphoton dissociation of CF_3I. Pressure effect with inert and reactive gases 465

IRMPI
Multiphoton geometrical isomerization of ClFC=CFCl. Selective purification of the *trans* isomer 455
2-Imino-3-(4-*p*-chlorophenylthiazol-2-yl)-4-thiazol
The synthesis and evaluation of 2-imino-3-(4-arylthiazol-2-yl)-4-thiazolidinones and their 5-arylidene derivatives as potential agricultural fungicides 33
Immobilised enzymes
Peptide synthesis catalysed by papain immobilised on polymer supports: Effect of the macromolecular structure and reaction conditions on synthesis 133
Immobilised papain
Peptide synthesis catalysed by papain immobilised on polymer supports: Effect of the macromolecular structure and reaction conditions on synthesis 133
Inert gases
IR multiphoton dissociation of CF_3I. Pressure effect with inert and reactive gases 465
Inertia
Relaxation dominated by inertia: Solvation dynamics of a small ion in a dipolar solvent 77
Inhibition of corrosion
Inhibitory effect of 2-mercapto pyrimidine on corrosion of copper single-crystal planes in 0·1 M H_2SO_4 763
Interaction potential
Theoretical aspects of IR-laser induced dissociation and desorption processes 363
Interference
Spectral hole-burning and holography 375
Internal conversion
Theoretical investigation of internal conversion in chromyl chloride 369
Intersystem crossing
Mechanism of vibrational relaxation and intersystem crossing within excited ion-pair states of I_2 417
Intramolecular dynamics
Laser and synchrotron-based sources for excited state intramolecular dynamics studies 225
Intramolecular excitation interaction
One- and two-photon spectra of some selected molecules: a comparative study 265
Intramolecular vibrational relaxation
Theoretical investigation of internal conversion in chromyl chloride 369
Iodine complexes
Conductometric study of charge transfer complexes 69
Ion cyclotron resonance
Laser vapourization; A versatile method for studying metal clusters 313
Iron oxide electrodes
An insight into the self-discharge of Fe_3O_4 electrodes in alkali solutions 161
Isobutane
IR multiphoton dissociation of CF_3I. Pressure effect with inert and reactive gases 465
Isomerisation
Isomerism in jet-cooled 1-cyanonaphthalene complexes 447
Isonicotinic acid hydrazide
Complexes of some lanthanides with acetoneisonicotinoyl hydrazone: A synthetic and spectral study 725

Kinetics
Kinetics of formation of 1,1′-*bis*(3-methyl-4-hydroxy phenyl)cyclohexane 149
Diffuse reflectance laser flash photolysis of adsorbed molecules 305
Kinetics and mechanism of the oxidation of some hydroxyacids by pyridinium fluorochromate 563
Kinetics and mechanism
Kinetics and mechanism of oxidation of carbohydrazide and thiocarbohydrazide by N-bromoacetamide 55
Mechanism of permanganate ion oxidation of diaryl sulphoxides – A kinetic study 637

Lanthanide chlorides
Studies on 4-*f*-metal(III) complexes of N-thiophene-2-carboxamidosalicylaldimine 701
Lanthanide complexes
Complexes of some lanthanides with acetoneisnicotinoyl hydrazone: A synthetic and spectral study 725
Lanthanide spectroscopy
One- and two-photon spectra of some selected molecules: A comparative study 265
Laser ablation
Laser production of clusters as precursors of ceramic metarials, semi- and superconductors 325
Laser diagnostics
Laser diagnostics of elementary processes in molecular beam scattering on surfaces 237
Laser excitaion
Features in the vibrational relaxation of laser excited Freon-22 molecules 429
Laser induced fluorescence
Laser vaporization; A versatile method for studying metal clusters 313
Laser isotope separation
^{13}C separation by IRMPD of CF_2HCl molecules with a powerful CO_2-TEA laser 471

Laser photolysis
Diffuse reflectance laser flash photolysis of adsorbed molecules 305
Laser spectroscopy
Isomerism in jet-cooled 1-cyanonaphthalene complexes 447
Laser vaporization
Laser vaporization; A versatile method for studying metal clusters 313
Laser vaporisation
Effect of trace elements on carbon microparticle formation 517

MNDO calculations
Electronegativity of the ionic groups. Evaluation from MNDO calculations 777
Magnetic field effect
Magnetic field effect on the exciplex luminescence as a probe for estimating the hyperfine interaction in a radical ion pair system 557
Mass spectral fragmentation
Reactions of cyclic anhydrides. Part XXII. Direct synthesis of N-aryl α-(2,3,4,5-tetrahydro-2-imino-4-oxo-1,3-thiazole-5-yl) acetamides 621
Mechanistic probe
Size dependence of gaseous cluster reactivity as a mechanistic probe 277
Metal clusters
Laser vapourization: A versatile method for studying metal clusters 313
1-Methacroyl-3-salicyloyl-2-hydroxy propane
Synthesis and characterisation of 1-methacroyl 3-salicyloyl 2-hydroxy propane and its derivatives – A structure-reactivity kinetic study 549
Micellar effects
Oxidation of dyes by manganese tetraphenyl porphyrin activated peroxy bleach 83
Michaelis–Menten kinetics
Kinetic study of oxidation of some thioacids by *bis*(2,2′-bipyridyl)copper(II) permanganate 747
Microparticle formation
Effect of trace elements on carbon microparticle formation 517
Mn–porphyrin
Oxidation of dyes by manganese tetraphenyl porphyrin activated peroxy bleach 83
Molecular beam scattering
Laser diagnostics of elementary processes in molecular beam scattering on surfaces 237
Molecular beam
Thermal detection laser spectroscopy of molecular beams 203
Sub-Doppler laser spectroscopy of molecules and clusters in cold beams 211
Design and fabrication of an indigenous molecular beam ultraviolet photoelectron spectrometer 591
Molecular electronegativities
Formation of lead pyrophosphate glass and the role of anion disproportionation 655
Molecular hardness
Improved hardness parameters for molecules 583
Molecular surface interaction
Laser diagnostics of elementary processes in molecular beam scattering on surfaces 237
Multiphoton dissociation
Multiphoton dissociation of some aromatic molecules. Formation of atomic carbon in the $2p^2\,^1S_0$ excited state 459
^3C separation by IRMPD of CF_2HCl molecules with a powerful CO_2-TEA laser 471
Multiphoton ionisation
Theoretical methods for the calculation of the multiphoton ionisation cross-section of atoms and molecules 251
Multiphoton dissociation of some aromatic molecules. Formation of atomic carbon in the $2p^2\,^1S_0$ excited state 459
Multiresonance CARS
Multiresonance CARS spectra of quinizarin in chloroform solution 383

N-thiophene-2-carboxamidosalicylaldimine complexes
Studies on 4*f*-metal(III) complexes of N-thiophene-2-carboxamidosalicylaldimine 701
N-Bromoacetamide
Kinetics and mechanism of oxidation of carbohydrazide and thiocarbohydrazide by N-bromoacetamide 55
Naphthonitrile
Isomerism in jet-cooled 1-cyanonaphthalene complexes 447
Neutral bidentate ligands
Synthesis and spectral studies on Co(II) and Ni(II) complexes with polyfunctional quinazolin-(3H)-4-ones 599
Nickel porphins and octaethyl porphyrins
Vibrational studies of nickel porphins and octaethyl porphyrins 571
Niobium gaseous cluster
Size dependence of gaseous cluster reactivity as a mechanistic probe 277
Nitrilotriacetic acid
Electrochemical behaviour of Cu–NTA complexes 107
Nonstationary state spectroscopy
From femtoseconds to biology: Mechanism of bacteriorhodopsin's light-driven proton pump 283

Normal coordinate analysis
Vibrational studies of nickel porphins and octaethyl porphyrins 571

o-Cresol
Kinetics of formation of 1,1′-*bis*(3-methyl-4-hydroxy phenyl)cyclohexane 149

O-hydroxynaphthoquinone
Studies on *bis*(cyclopentadienyl) titanium(IV) cheltes of biologically active O-hydroxynaphthoquinone and its derivatives 607

OH radicals
The kinetics of hydroxyl radical reactions with cyclopropane and cyclobutane 499

Octahedral geometry
Synthesis and spectral studies on Co(II) and Ni(II) complexes with polyfunctional quinazolin-(3H)-4-ones 599
Studies on salicylaldehyde-2-aminobenzophenone-2-thenoylhydrazone complexes with 3*d* metal ions 691

Optical double resonance
Sub-Doppler laser spectroscopy of molecules and clusters in cold beams 211

Oxazine 4
Time resolved fluorescence spectroscopy 395

Oxidation
Kinetics and mechanism of oxidation of carbohydrazide and thiocarbohydrazide by N-bromoacetamide 55
Oxidation of dyes by manganese tetraphenyl porphyrin activated peroxy bleach 83

Oxidation of primary amines
Oxidation of primary amines with dioxygen catalysed by an oxygen carrier cobalt(II) Schiff base chelate, CoSMDPT 741

Oxidation mechanism
Kinetics and mechanism of the oxidation of some hydroxyacids by pyridinium fluorochromate 563

p-Methoxybenzyl halide
Are all charge-repulsed carbocations really unstable? Dramatic difference in reactivities of benzyl- and *p*-methoxybenzyl halides in benzene 195

$Pb_2P_2O_7$ glass
Formation of lead pyrophosphate glass and the role of anion disproportionation 655

Peptide synthesis
Synthesis of substance P partial sequential peptides on a photolytically removable 4-aminomethyl-3-nitrobenzoylaminomethyl polystyrene support 43

Perborate
Oxidation of dyes by manganese tetraphenyl porphyrin activated peroxy bleach 83

Permanganate oxidation
Mechanism of permanganate ion oxidation of diaryl sulphoxides – A kinetic study 637

Phase diagrams
Recovery of sodium chloride, sodium sulphate and sodium carbonate from Sambhar Lake brine – A theoretical study 9

Phase transitions
Laser Raman spectroscopy and its applications – especially in structural phase transitions 295

Phase-transfer catalysis
Phase transfer catalysis: Kinetics and mechanism of hydroxide ion initiated dichlorocarbene addition to styrene catalysed by triethylbenzylammonium chloride 785

l-Phenylalanine
Studies on Schiff base complexes: Formation constants of Cu(II), Ni(II) and Zn(II) complexes on N-salicylidene-L-valinate, L-phenylalaninate and L-tryptophanate system 707

Phenoxyl radical
Chloride-catalyzed oxidation of phenol in pulsed-laser irradiation titanium dioxide sols 505

Photoacoustics
SO_2 absorption of the CO_2-laser emission measured by the photoacoustic technique 401
CH_3F absorption of the CO_2-laser emission measured by the photoacoustic technique 405
Buffer gas effect on laser photoacoustic spectra of methyl chloride 409

Photochemical isomerization
Photochemical isomerization in the absence of a potential barrier 441

Photochemistry
Thermal and photoreactivities of oxalato*bis*(polypyridyl)chromium(III)complexes in aqueous medium 715

Photoinducted electron transfer
Simultaneous photolysis of directly linked porphyrin–diazonium salt molecule 487

Photolysis of phenol
Chloride-catalyzed oxidation of phenol in pulsed-laser irradiation titanium dioxide sols 505

Photoremovable polymeric supports
Synthesis of substrate P partial sequential peptides on a photolytically removable 4-aminomethyl-3-nitrobenzoylaminomethyl polystyrene support 43

Photosensitization
Photoinduced inter- and intramolecular electron transfer reactions of carboxylatopentaammine-cobalt(III) and excited state *tris*(2,2′-bipyridine) ruthenium(II) complexes 735

Poly(1,3-[2-methoxy-4-hydroxy-5-acetylphenylene] butylene
Poly(1,3-[2-methoxy-4-hydroxy-5-acetylphenylene]butylene) (HMAP-BG) as a polymeric ligand 123

Polyatomic molecules
Features in the vibrational relaxation of laser excited Freon 22 molecules 429

Polymer-anchored Rh(I) catalyst
Polystyrene anchored rhodium(I) bidentate ligand complexes as catalysts for hydrogenation 99
Polymeric ligand
Poly(1,3-[2-methoxy-4-hydroxy-5-acetyl-phenylene]butylene)(HMAP-BG) as a polymeric ligand 123
Porous iron electrode
Electrochemical characterization of porous iron electrodes 753
Porphyrins
Simultaneous photolysis of directly linked porphyrin-diazonium salt molecule 487
Protein dynamics
Flexibility of the aldolase molecule measured using quenching-induced variations of the Forster distance for fluorescence energy transfer 435
1 Ps laser source
A new tunable 1 ps laser source applied to time-resolved absorption spectroscopy of dye solution 389
Pulse radiolysis
Redox reactions of 2-hydroxy pyridine: A pulse radiolysis study 667
Pulsed lasers
